

On April 22 students, staff and board members of the Discovery School of Faribault went to beautify their adopted site. The Discovery School sign is just outside of Nerstrand between markers 15 and 17. This was a great way the school felt that they could give back to the communities that have been so supportive to their school. The students were happy to help preserve the wildlife and help clean up the roadsides by some of the farms outside of Nerstrand near our site. They were all full of pride knowing that they were actually doing their part for their school, city and the environment. They sang songs and made a game out of picking up the liter on the roadside, while making the environment a cleaner place. This was a great learning experience for them and a great way to learn about community service. The Discovery School looks forward to doing what they can to help preserve our community for tourism and the wildlife. (Photo provided)
